About

Backend-focused MERN developer with strong Data Structures & System Design fundamentals. Experienced in building scalable REST APIs, authentication systems, and deploying production applications. Active GitHub contributor with consistent project-based learning and real-world problem solving.

Education

Chandigarh University

B.E. Computer Science

Aug 2023 – Present

Kharar, Punjab

DAV Public School

Class XII (CBSE)

2021 – 2023

Shimla, Himachal Pradesh

Projects

IKAAYA – MERN E-commerce Platform

Nov 2025 – Feb 2026

- Built full-stack e-commerce platform supporting authentication, catalog browsing, cart, and order workflows.
- Designed RESTful APIs using MVC architecture for scalable backend structure.
- Optimized MongoDB queries using indexing to improve response performance.
- Implemented JWT authentication, role-based authorization, and centralized error handling middleware.
- Handled product filtering, pagination, and search through structured schema modeling.
- Deployed frontend on Vercel and backend on Render with production environment configuration.

Experience

Deloitte Australia

Software Engineering Job Simulation

Jun 2025

Virtual

- Completed a virtual job simulation focused on software engineering workflows and technical consulting.
- Reviewed hypothetical business requirements to understand how basic system architectures are proposed.
- Gained practical exposure to the Software Development Life Cycle (SDLC) and evaluating technical trade-offs.

Relevant Coursework

- Data Structures & Algorithms
- DBMS
- System Design
- REST API Design
- MERN Development
- Object-Oriented Programming

Technical Skills

Languages: C++, JavaScript, SQL

Frontend: React.js, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, Postman, Vercel, Render

Core: Data Structures & Algorithms, DBMS, System Design
